QUARTETS Christmas Card Game

QUARTETS

Christmas Card Game

QUARTETS Christmas Card Game

How to Play:

Objective: The aim is to collect as many Quartets as possible. The player with the most complete sets emerges victorious!

Getting Started: Shuffle the cards well. Each player is dealt 5 cards, which they should hold without revealing. Place the remaining cards face-down in a pile at the centre of the table.

Taking Turns: The first player inquires if another player possesses a card from a specific category based on the cards they hold. For example, if you have a card from the "Alphaboat" category, you may ask another player if they have a card from the same category.

- If the answer is "No," the turn concludes for that player.
- If the answer is "Yes," the asking player attempts to guess which specific card from that category the other player holds (e.g., "Polly"). The turn continues until a "No" response is received.

Completing a Quartet: Upon gathering all four cards of a category, place the completed Quartet set aside on the table.

Replenishing Hands: Players should maintain a hand of 5 cards at least by drawing additional cards from the central pile as needed.

Enjoy!
